

We care about your health and want to make sure you have the tools and resources you need to help manage your diabetes. Diabetes can affect your body including your kidneys, eyes and feet. Routine screenings are one way to help keep your diabetes in check.

It's important to your health that you have the following screenings done at least once a year:

Screening	Description	Where to get Screening?	What is your Status?
A1C	Checks your blood sugar over the past three months	<ul style="list-style-type: none"> Health Care Team 	«CDC_CompDiabCare_A1cTest»
Kidney	Checks how well your kidneys are working	<ul style="list-style-type: none"> Health Care Team 	«CDC_CompDiabCare_NephAttn»
Eye	Checks for issues in your eyes	<ul style="list-style-type: none"> Health Care Team Eye Care Team 	«CDC_CompDiabCare_EyeExam»

After you complete your screenings, you can discuss your results with a member of your healthcare team. Your care team may include a provider, pharmacist clinician, physician assistant, specialist, nurse or other medical staff.

Contact Us
